On-chain Real Money Gaming

Real money skill games are terrible for users

- No transparency: companies cheat their customers
- Bad UX: waits and limits on withdrawals

When playing this game I feel entertained, but somewhat scammed. The devs entice you with casual money possibilities and all sorts of ways to "easily" get the money, especially on the wheel spin option. However despite $10 and $20 being right next to the number I randomly land on, the highest I've ever made doing these spins is 5¢ even with random chance, after 50 spins surely I would have landed on something more realistic but nope the results are fixed. 🐝
